Toluene, n-Butyl Acetate, Ethyl Acetate, Ethyl Alcohol, Isopropyl Alcohol, Methanol, Xylene, and Acetone are all constituents of the paints and varnishes used to finish the cabinetry pieces or solvents used to clean equipment at the Facility. Particulate Matter is produced during the construction and assembly of cabinetry pieces at the Facility. The Facility manufactures cabinetry for use in kitchens and bathrooms.

As per the plan objectives, at the time of writing, AyA did not intend to reduce the use of Toluene, n-Butyl Acetate, Ethyl Acetate, Ethyl Alcohol, Isopropyl Alcohol, Methanol, Xylene, and Acetone, but would continue to conduct further research to identify new reduction options and to keep up with industry standards with regards to these substances. Although AyA does not intend to further reduce the creation of Particulate Matter, they will continue to conduct further research to identify new reduction options and to keep up with industry standards with regards to PM pollution prevention.

No amendments were made to the Toxic Reduction Act Plans for Methanol, Methyl Ethyl Ketone, Toluene, 2-Butoxyethanol, n-Butyl Acetate, Ethyl Acetate, Ethyl Alcohol, Isopropyl Alcohol, Xylene, Methyl Isobutyl Ketone, Solvent Naphtha Light Aliphatic, Solvent Naphtha Medium Aliphatic, Acetone and Particulate Matter (PM10 & PM2.5).
